Improvements:

- Xsens Link - Improvement in battery management, no need to discharge and recharge the hub on first use

Bugs fixed:

- # Restore/load layout functionality does not fall back to default option anymore.
- # Previously selected hardware actor configuration is now always restored correctly in OBR mode.
- # No need for trackers to be connection when setting up the Sync station in Motion Capture Configuration.
- # Linux: Available software-version now showing
- # Linux: Update notifications are now working
- # Added ApplImage packaging for MVN Studio and Xsens License Manager, eliminating Linux dependency/version conflicts
- # Uninstalling Xsens Software does not give you a pop up of Bonjour anymore.

Known Issues:

- # Enabling GNSS in the Live Mocap Config window causes software to crash
- # Fbx exporter exports wrong T-pose
- # Changes to a stream is not always directly applied (re-enable to fix)
