

PLM Solutions

MVN BIOMECH

Live stream motion capture data in PLM Solutions

Xsens

MVN BIOMECH, a 3D kinematics inertial measurement system, captures human movement data, in real-time anywhere. Live stream this highly accurate data to Product Lifecycle Management (PLM) software provided by Xsens PLM Technology Partners, to improve time to market of products and processes in a simple and efficient way.

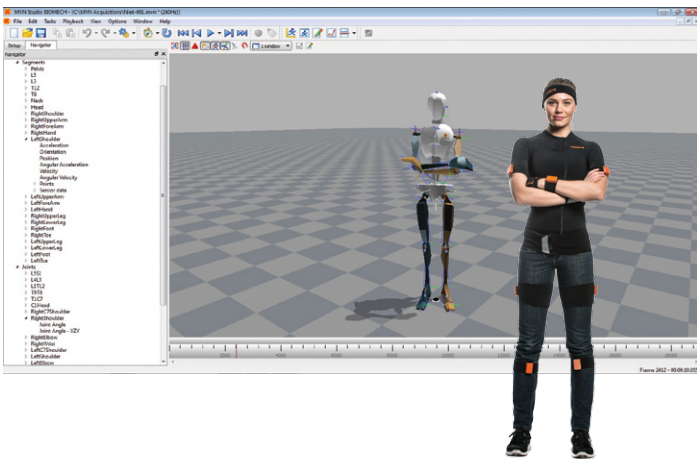

Xsens PLM Solutions advantages

- Fast set up
- Real-time 3D kinematics data
- Real, natural movements
- Occlusion-free motion capture data
- Capture data in the actual or simulated environment
- Easy, accurate submergence into digital mock-ups
- Improve time-to-market
- Improve safety and ergonomics in the workplace

Xsens PLM Solutions can stream into:

- Siemens Jack
- Siemens Process Simulate Human
- Haption RTI for Delmia V5/6
- Haption IFC for Catia
- Haption IPP for 3DVIA

Xsens PLM Solutions can be used anywhere

- Tight spaces, such as a Cockpit or Inside a car
- Open spaces, such as a Hangar or Driving range
- Workplace, such as a Factory floor or Assembly line
